

EASTER Holiday Camp

Schedule March/April 2019

3 or 5 DAY LEGO Robotics/ LEGO Engineering camps

Using LEGO as a powerful learning tool. We offer theme based children’s technology program aimed at helping younger children (aged 3-5) understand basic LEGO Engineering concepts and be adept at using cool technology whilst having a great time. We use simple machines DUPLO LEGO so smaller hands can easily pick up the pieces and build independence in completing projects themselves.

Children in this camp will also be exposed to creative story telling using digital media.

For our older children aged 5 and up , we customised our popular Robotics Program and made basics robotics accessible to children who are showing interest in being exposed to lego robotics and programming. Children will learn concepts of LEGO mechanics and robotics.

To accommodate parents with varying schedules, we have now 3 days and 5 day camps.

Weeks	Dates and times	Camp Type	Ages	Camp cost
<u>Week 1</u>	18th -22nd March 2019 -930am-12pm	myCamp Junior App Robocamp (Dinobots)	3-5 years for MYCAMP Junior	\$349 for 3 days
