**\$50**

Sign up for a trial class!

**\$60/hr** for ages 3 - 5**\$55/hr** for ages 6+**APPRENTICE ENGINEER** (ages 3 to 5) \$400 for 8 x 1-hour sessions or \$220 for 4 x 1-hour weekday sessions

An introductory course to basic mechanisms that aims to foster curiosity and the love of learning among our youngest participants. Children will start with Duplo® and progress to using Lego®. They will get to develop fine motor skills and visual-spatial abilities, while exploring concepts such as cause and effect, gears, pulleys and more.

**JUNIOR ENGINEER**

(ages &lt;6) \$400 for 8 x 1-hour sessions or \$220 for 4 x 1-hour weekday sessions

(ages 6 to 8) \$360 for 8 x 1-hour sessions or \$200 for 4 x 1-hour weekday sessions

Through hands-on projects building Lego® machines, children will be exposed to a variety of mechanical concepts and the science of physics, such as friction, gravity, gears and levers, as well as their real life applications. The course will also enhance their critical thinking and problem solving skills.

**SENIOR ENGINEER**

(ages 8+) \$360 for 8 x 1-hour sessions or 4 x 2-hour sessions or

\$200 for 4 x 1-hour weekday sessions

This course is for older participants or those who have completed Junior engineering. Children are challenged with more complex Lego® machines, and will continue to learn about various physics and engineering concepts, including gear ratios, lever classes, stability, among others. They will be inspired to become more confident learners and problem solvers.

**ROBOTICS**

(ages 8+ or those who have completed Senior Engineer)

\$360 for 8 x 1-hour sessions or 4 x 2-hour sessions or

\$200 for 4 x 1-hour weekday sessions

Children will take one step further from making their Lego® machines to programming them, based on Lego® NXT, Mindstorms EV3 and Spike Prime systems. They will learn basic computer coding and develop logical thinking. Using science, engineering and computational concepts, children will bring their builds to life.

**ANIMATION**

(ages 8+) \$360 for 8 x 1-hour sessions or 4 x 2-hour sessions or

\$200 for 4 x 1-hour weekday sessions

This discovery-based course aims to stimulate creativity and improve planning and organizational skills in our participants. Children will learn how to create a storyboard and digitalize their ideas, turning them into animation using Lego® elements. They will plan, script, shoot and direct their own "movie", complete with voice recording and dialogue, music and sound effects.

**GRAPHIC DESIGN**

(ages 7+) \$360 for 8 x 1-hour sessions or 4 x 2-hour sessions or

\$200 for 4 x 1-hour weekday sessions

This course will introduce participants to the fundamentals of graphic design. Children will learn the design process, typography, color theory and how to edit and create graphics using Photoshop, the industry's leading software. Equipped with the knowledge, they will work on projects where they will exercise and boost their creativity.

**3D MODELLING**

(ages 8+) \$400 for 8 x 1-hour sessions

Saturdays only

This course provides an introduction to 3D design and printing, covering design thinking and key considerations. It teaches the use of Tinkercad and allows participants to design and print their own innovative products to take home.

**Schedule**Mon/Tue/Thur 3:30 pm - 4:30 pm  
4:30 pm - 5:30 pmSat 9:45 am - 10:45am  
11:15am - 12:15pmSun 9:45 am - 10:45am  
11:15am - 12:15pm\*Wed/Fri 3:30 pm - 4:30 pm  
4:30pm - 5:30pm
