

3- to 5- Half-Day Lego Robotics Camp (for ages 7+)

Our campers will gain a good understanding in Lego Robotics, from design, construction and engineering to coding and programming concepts, through 100% hands-on projects. They will build and code interesting Lego robots that perform different functions.

As children tackle more complicated projects over the course of the camp, they will become more competent in both engineering and coding. They will also get to learn through trial and error while having fun, plus develop logical thinking and problem-solving skills throughout the process.
