

2- Full-Day Minecraft Game Design Camp (for ages 7+)

Children will think creatively to design their own Minecraft adventure map and plan out the in-game challenges. They will then test play both their own and each other's projects, learning how to identify and overcome problems as a team in a constructive manner along the way.

Advanced Minecraft players will learn how to expand on their world's abilities through scripting tools to create their own story driven map, as well as how to use external editing programs to work on larger scale projects.

The camp will help boost children's creativity and their planning, design, collaboration and problem solving skills.
